Summary

Hi there , I am a inspiring software developer skilled in coding and highly enthusiastic about teamwork and collaborative learning. Have strong skills in C++,Python,Javascript, MERN based full stack development and Database Management. Passionate about building scalable applications and applying software engineering principles to real-world projects.

Technical Skills

Category	Skills
Languages	Python,C, C++, JavaScript, SQL
Frameworks/Libraries	React/Next.js, Node.js, Tailwind CSS, Three.js ,React Three Fibre,GSAP/Framer-motion, NumPy, Pandas ,Matplotlib,Seaborn, Scikit-learn
Databases	PostgreSQL, MongoDB
Tools&Others	Git, Github, Socket.io ,Figma,Canva,Postman, Vercel

Professional Experience

DOUM - Fullstack Web Developer Intern

📍 Kolkata | 25 Jan 2025 - 15 Mar 2025

- Developed responsive web applications using Next.js and TailwindCSS
- Implemented interactive 3D elements using Three.js and React Three Fiber
- Collaborated with design team to create seamless user experiences
- Optimized application performance and implemented modern animations with GSAP
- Project available @ <https://doudm-cwfo.vercel.app/>

Projects

MindMate Landing Page - Virtual Therapist An NLP-powered chatbot designed to provide empathetic and supportive conversations for mental well-being.

<https://github.com/Deepsayan-Das/Mind-mate>

- Designed & developed a modern UI for MindMate using Nextjs Gsap And Threejs improved UX using Lenis
- Deployed the landing page using vercel (link:<https://mind-mate-theta.vercel.app/>)

Green Lens – A sustainability-focused web platform that helps users reduce their carbon footprint by tracking eco-friendly actions and rewarding them with blockchain-based Green Tokens redeemable for environmentally friendly products.

<https://github.com/Deepsayan-Das/GreenLens>

- Created a modern frontend using Next.js with GSAP animations for an engaging user experience.
- Implemented secure authentication and user management using Clerk.
- Developed a blockchain-based Green Token system managed through a Solidity smart contract.
- Integrated a machine learning model to analyze uploaded documents and determine token rewards based on carbon impact.
- Built a scalable backend using Express.js and FastAPI to handle token management, ML inference, and application logic.
- Deployed the Landing Page using Vercel (link: <https://green-lens-nine.vercel.app/>)

Sports, Yoga & Dance Pose Identifier – A computer vision-based image classification system that accurately identifies sports actions, yoga poses, and dance postures using state-of-the-art deep learning models fine-tuned on custom datasets.

- Developed an image classifier using SOTA computer vision and deep learning architectures.

- Fine-tuned models on curated datasets for sports, yoga, and dance pose recognition.
- Achieved high classification accuracy through data preprocessing and model optimization.
- Published a research paper presenting the methodology, experiments, and results of the system.

Personal Portfolio Website - A modern, responsive portfolio web application showcasing projects, skills, and experience with a strong focus on smooth UI/UX and performance.

<https://github.com/Deepsayan-Das/Portfoliov3.0>

- Built using Next.js with a scalable and component-driven architecture.
- Implemented fluid animations and transitions using Framer Motion and Lenis for an enhanced user experience.
- Optimized for performance, responsiveness, and SEO best practices.
- Deployed on Vercel (link: <https://portfoliov3-0-cyml.vercel.app/>)

Truth Scope – An in-development Google Chrome extension that analyzes on-screen content in real time and uses machine learning models to estimate and display a reliability score for the information being viewed

- Developing a browser extension to detect and extract visible screen content using Chrome Extension APIs.
- Integrated a machine learning-based pipeline to evaluate content credibility and generate reliability scores.
- Designed the system to work in real time with minimal performance overhead.
- Focused on scalable architecture to support future model improvements and wider content sources.

Education

Jadavpur University

B.E. Information Technology

📍 Kolkata | 2024-2028

Leadership & Extracurricular Activities

- **ACM Student Chapter, Jadavpur University**

Web Development Team Member

- Active member of the Web Development Team, contributing to the development and maintenance of the chapter's web platforms
- Collaborated with designers and developers to implement responsive and user-friendly interfaces
- Participated in code reviews, technical discussions, and peer learning initiatives
- Supported technical events and workshops by delivering web-based solutions

Achievements & Awards

- **1st Place – PitchGenix 2025**

Organized by Entrepreneurship Cell, Jadavpur University
